Rates are per 100,000 and age-adjusted to the 2000 US Std Population (19 age groups - Census P25-1130) standard; Confidence intervals (Tiwari mod) are 95% for rates and ratios from Oregon Cancer Registry. Mammography data is from the Behavioral Risk Factor Surveillance System U.S. data: incidence for 2002-2006; mammography screening for 2006; mortality for 2002-2006.

~Statistic could not be calculated.

^Statistic not displayed due to fewer than 10 cases.

#The rate ratio indicates that the rate is significantly different than the rate for Oregon (p<0.05).

†Percent based on less than 50 respondents or fewer than 12 persons in one age group; may not accurately reflect behavior of entire county.
